## The Seoul Platform for Initiating Discourses on Equitable and Resilient Society

Call for Papers  
: Global Urban Humanities  
Designated Research Program of  
The Seoul Institute

The Seoul Institute (SI) is calling for papers on twelve designated topics related to fundamental social change for the better. The papers should be previously unpublished work free from plagiarism submitted in English (or Korean in the case of Korean writers). The SI Editorial Board will select up to 20 papers (1 or more from each topic) on the basis of abstracts and short biographies. The selected papers will be published online under a Creative Commons license BY-NC-ND. The authors may also be invited for online forums to talk about their works. The SI will pay the authors a one-time royalty of 5 million KRW (i.e. about 4,000 USD) before tax and transaction fees after publishing the papers online by the end of February 2021.

Submissions are encouraged from all fields related to discourses on equitable and resilient society for a 'good-life oriented' society, such as philosophy, political economy, social policy, sociology, environmental studies, and politics.

### List of Topics
